

For your very best skin at any age.

OptaDerm

**OptaDerm, founded in 1987, by  
Chief Chemist Dean-Richard Johansson**

## Our Story

OptaDerm clients know the value and benefits of professional skin care, and regular visits to our clinic are part of their self-care routine. Dean-Richard, OptaDerm's Founder and Chief Chemist explains: *"The skin is our body's largest organ, and needs regular maintenance over our lifetimes, as we mature and circumstances change. When you first visit OptaDerm, our aestheticians will analyze your skin by look and by touch, find out your age, what products you're currently using, and then choose the OptaDerm products and the treatments that are right for you. You simply can't do that in a drugstore or by purchasing products online."*

We'll help you have the very best skin at any age, with proper consultation & care, effective laser therapy, and products created for specific needs. Our services include our signature European-style facial treatments, together with specialized enhancements such as collagen and deep glycolic peels. We use a variety of non-ablative lasers, intense pulse-light therapies, and thermal contraction treatments to perform the skin rejuvenation results you desire, including hair reduction. We also provide facial waxing, brow work, colour and makeup application (along with makeup lessons).

One other thing that makes OptaDerm unique is that our skincare products are researched, formulated and manufactured in our very own BC-based clinical laboratory, using peer-reviewed, science-proven, active ingredients like peptides and vitamins, sourced from around the world. Dean-Richard: *"When making a skin care product, you have to use effective quality ingredients in formulations with the proper pH balance for your skin. When you use a product that has the right pH for you, it feels gentle on your skin, with no sense of burning."* We will happily explain the reason why each ingredient makes it into each one of our product formulas and how it can help give you beautiful skin. We believe in our cosmetics and body care products, and once you try them for yourself, you will, too. Dean-Richard emphasizes: *"There's no great mystery to making good skin care products. There's no great 'magical ingredient' out there. People get bombarded by all this "stuff", all the time. The right skin care doesn't have to cost you thousands of thousands of dollars."*

---

**You can have the very best skin at any age, through proper consultation & care, effective laser therapy, and products created for your specific needs. That's the OptaDerm promise.**

---

Your OptaDerm aesthetician will look at your skin with trained eyes, and offer solutions that will improve the texture, tone and resilience of your skin, whatever its type. You'll appreciate the economical product samples and detailed home care instructions we provide after every appointment (we're always interested to see what works best for you, over time, and in your own home). P.S: We'll always advise you when a treatment or a product isn't a good fit for your skin, or just isn't needed.

We encourage you to take a few minutes to read more about what we do and what you can do, to keep your skin looking and feeling its best.

## Skin Care

---

**First, here are five critical aspects to your skin care you need to know about: cleansing, exfoliation, protection, moisturizing, and problem solving.**

---

**Cleansing:** A simple rule to remember is that the skin on your face should always be kept clean (but don't overdo it). Massage the cleanser we've recommended into your face gently and thoroughly, followed by a thorough rinsing with warm water. This will help keep pore congestion and blackheads to a minimum. Use a tonic afterwards, especially if your water pH is too hard or soft, or carries some impurities. Feel your skin afterwards. Does it feel refreshed, not dry, tight or greasy? Congratulations, you're doing it right!

**Exfoliation:** Our home exfoliation products use either beads or grains to rub off the top layer of skin cells; micro-exfoliation achieves the same results using enzymes and/or gentle acids. Your skin type will determine the right solution and frequency of exfoliation for your skin (we'll advise you on this). Exfoliation will keep your skin looking bright and clear, while stimulating the production of new skin cells in the epidermis, giving you younger and smoother looking skin.

**Protection:** When your skin ages before you're sixty, it's probably from exposure to UVA and UVB rays, that started damaging your skin in childhood. UVA rays are the aging rays and cause tanning of the skin; but UVB rays cause burning and damage the skin much faster. OptaDerm offers both highly advanced organic and inorganic products to protect you from UV rays. Organic products are synthesized from natural ingredients and must be combined to achieve a SPF of 15 or more. Inorganic are made with minerals from the earth, and form a physical block to achieve a SPF of 15. Remember, sunscreens will stop your skin from burning, but not from tanning. Ask us about UVA and UVB protection for your skin; it's never too early or too late to be kind to your skin.

**Moisturizing:** The proper moisturizing regimen will keep your skin feeling supple and smooth. Both genetics and age determine the breakdown of the skin's barrier function. We'll determine how protected your skin is, and whether hydration (water) or lubrication (oil) is needed. Check with us on how you're doing with moisturizing, as many internal and external factors come into play over time.

**Problem Solving:** Specialized OptaDerm products can be added in at any stage of your skin care regimen to address issues such as the "little nasties": blemishes, sensitivity, lines and wrinkles, and pigmentation.

Interested in finding out precisely what OptaDerm products will work best on your specific skin needs? Then come and experience a European Facial. By examining your skin, working with it and feeling it, our aestheticians will be able to recommend precisely the right combination of products for you.

## Factors that can affect your skin

Your aesthetician will ask you about certain things that might be affecting your skin. These can include climate, hormones, diet, stress (and irregular care).

Climate will affect your skin greatly; warm climates and seasons can stimulate oil production and cause dehydration. Dry, colder climates can cause both dehydration and skin discomfort.

Hormones can also dictate the amount of oil (sebum) your skin produces, and subsequent dryness.

Diet greatly affects our well-being, and the condition of your skin is often a reflection of a change in eating habits. Food allergies and sensitivities can influence the condition of your skin as well.

Stress will often cause our skin to act up. Remember, an active lifestyle and good sleeping habits are your skin's best friends.

Not all skin care is good skin care. Poor skin care habits can be detrimental, and not beneficial to your skin. It's critical to learn about your unique skin, along with the care and products it needs. Proper skin care will achieve a balance between pH, barrier function and comfort, but keep in mind that as we go through life and its changes, our skin care regimen needs to change as well. This is important, too; what works for your friend may not be suitable for you.

## Our Aesthetic Skin Care Services

### **The OptaDerm Signature European Facial** 60 minutes \$65

#### *Part Luxury and Part Analysis*

This luxurious one-hour treatment combines a relaxing aromatherapy face and neck massage, thorough deep pore cleansing, skin-smoothing peeling and a calming facial masque—all tailored to your skin type. European-style facials have always used a light oil massage and deep-pore cleansing without the irritation or over-stimulation of steam. Our Aestheticians use this treatment to evaluate your skin for further recommendations on your home care regime, products, or other services to consider.

### EUROPEAN FACIAL ENHANCEMENTS

#### Extra services to add to your Facial, no extra time required

We can enhance your European Facial Treatment experience with these extra services. We offer three complementary treatments that may be added to your European Facial treatment. Please discuss these procedures with your Aesthetician to confirm if they are suitable for your skin.

### **Deeper Glycolic Peel—20% or 30% for added exfoliation** \$35

If you desire or need added exfoliation; other than the Malic Acid (from grape seeds) and Ascorbic Acid (naturally-sourced Vitamin C) Peel included in the European Facial; we can enhance your facial exfoliation with a Deeper Glycolic Acid Peel (sourced from Apples and Grapes).

### **Eye Treatment** \$15

A special gel masque with a warm or cool blue masque to soothe, calm, and help “de-puff” the delicate eye area. This treatment is applied while you relax with your exfoliator and skin masque during your facial.

### **Collagen Ampule** \$25

Perfect for that added plumping at the end of your facial. This marine-based collagen will mimic the fibroblast cell structures in your dermis. A few drops will give the appearance of extra-soft glowing skin. Keep left over serum for at-home treatments.

### **The Resurfacing Facial**

40 minutes

\$52

*Cleanse – Peel – Moisturize*

A deep glycolic treatment that leaves your skin smooth and rejuvenated. Recommended for acne-prone skin. Your skin-type will dictate if you need a 20% or 30% glycolic strength treatment, complete with a pH balancing masque. Your skin will glow! Recommended 2 to 6 times per year. This is a quick 40 minute treatment. Your aesthetician will review your skin type before recommending a precise strength of the glycolic used. Our Glycolic program is an aesthetic-based non-ablative service.

## OTHER AESTHETIC SERVICES

These Aesthetic services may be booked online or by phone. You can book them as stand-alone services or add them when you book your European Facial or Resurfacing Facial, but we do require extra time to be reserved in advance for these services:

### **Brow Shaping** \$20

Brow arching and shaping for a perfect and complementing look based on your facial structure. Please advise of your preferred methodology. OptaDerm can use a combination of waxing and/or 'tweezing'.

### **Brow Tinting** \$30

OptaDerm uses RefectoCil Eyebrow Tints to adjust your brows to compliment your skin tone and hair colour as needed.

### **Facial Waxing** \$10-\$40

OptaDerm utilizes a fine grade of wax. Price varies from \$10 to \$40 depending on coverage required. We recommend making your appointment online and then a quick follow-up by telephone call so that we can quote the precise cost properly. You can still manage your booking online as needed after initial booking.

### **Colour and Make-Up Application** 30 minutes \$30

A professional make-up application for a special event. Allow our specialists to give you the right look for any occasion. Please try to arrive with a clean moisturized face. However, we will happily assist in removing your existing make-up if required.

### **Colour and Make-Up Lesson** 60 minutes \$52

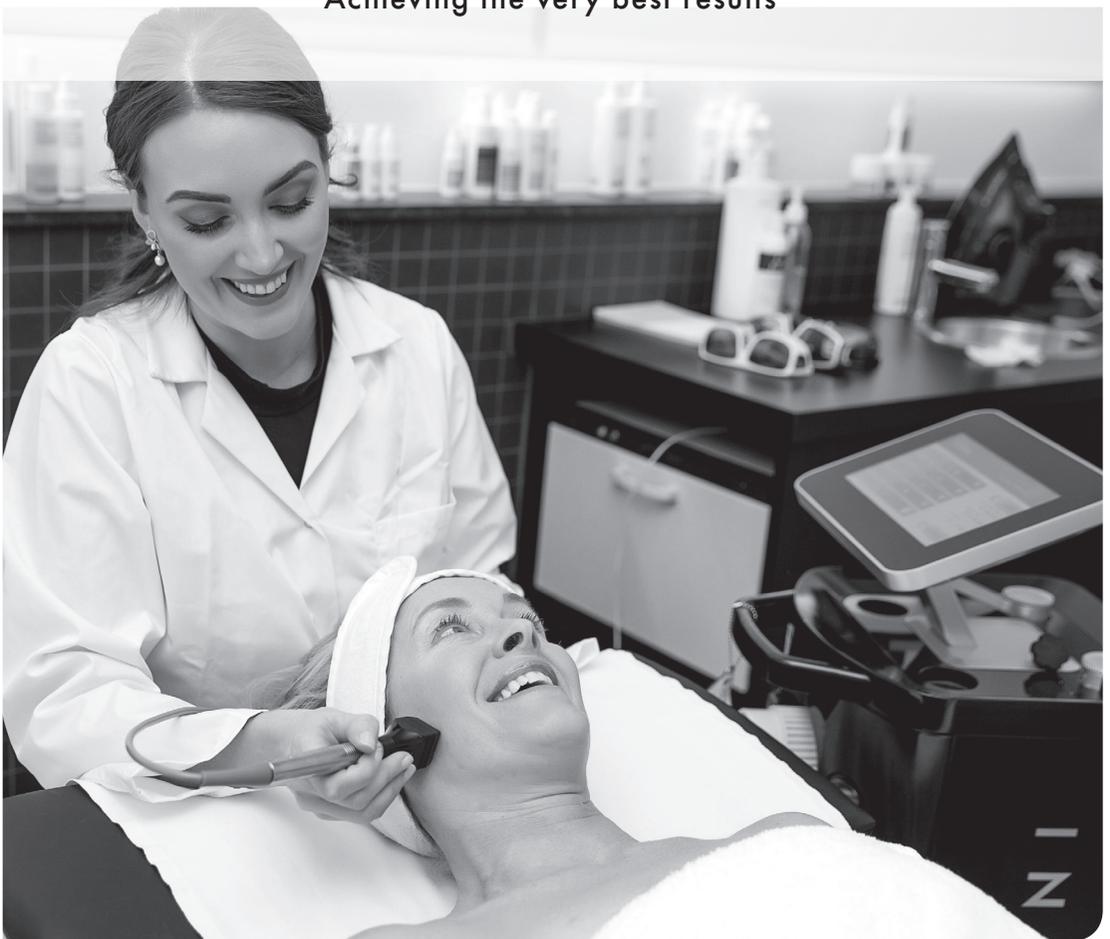

Learn what colours and makeup techniques best suit you and your lifestyle. From easy and minimal to high glamour – you will show the tips to make you feel comfortable and confident. You will also have time to practice the application techniques yourself. Please try to arrive with a clean moisturized face. However, we will happily assist in removing your existing make-up if required.

### **Make-Up Touch-Up and Go** 10 minutes \$7

If you have a meeting or an event directly after your Facial treatment we would be pleased to lightly re-apply your make-up and colour to reduce any appearance of redness from your treatment. This is a quick 10 minute service to let you get on with your business day. *Not available to book online or as a standalone service.*

# Aesthetic Laser and Thermal Contraction Services

**Initial Consultations and Radio Frequency Treatments can be booked online, but all other Laser treatments are booked in direct consultation with our staff to ensure proper treatment schedules and best practices are followed to give you the very best results possible.**

## Test Patch and Consultation

\$50

*(A credit will be applied to your first treatment)*

Before starting any course of action with Aesthetics Lasers, the OptaDerm Laser Program requires that you book a consultation with a Laser specialist to discuss your needs, complete a brief medical form, a service waiver, and allow our specialists to test a small patch of skin in a nondescript place (usually your inner-forearm). We will follow-up to note any adverse reactions to the testing patch. Your test patch and consultation can be booked online and the \$50 fee is fully deductible from your first laser or radio frequency treatment. If you are a new client to OptaDerm we also recommend having at least one European Facial treatment to allow our aestheticians to make comprehensive notes on your current skin issues for the laser technicians to review.

## Skin Resurfacing with Fractional 1540 Laser

The Cynosure 1540 Fractional technology is a non-ablative, aesthetic skin resurfacing service. This microbeam technology extends through the epidermis into the dermis to trigger the body's natural healing process to

create collagen and elastin. Microbeams can be customized to go deeper for scar revision or scattered for texture and tone improvement and pore minimization. OptaDerm uses Cynosure's Icon Aesthetics System to deliver high-speed, quick 1540 Fractional treatments that bring long-lasting results. The Advanced Contact Cooling offers moderate comfort.

A series of 6 treatment sessions will normally be needed for desired results, with annual touch-ups for clients under 50 years of age, and 6-month touch-ups for clients over 50 years of age. OptaDerm has several price points depending on the area you wish to have service. We recommend having a European Facial first and then consulting with your Aesthetician as to the right treatments for you to consider before booking online.

### Price Per Treatment Session

Face	\$180
Face and Neck	\$260
Face, Neck and Chest	\$340
Hands	\$100

## Photo-Rejuvenation with IPL Laser

Skin rejuvenation is a non-ablative aesthetics-based service that will improve the skin's appearance. This advanced IPL light-based treatment clears brown spots, age spots, sun damage, and improves unsightly veins including broken blood vessels, facial veins, and rosacea – revealing a clearer skin. OptaDerm uses Cynosure's Icon Aesthetic System (TM) to deliver pulses that target these skin imperfections. The Advanced Contact Cooling (TM) system offers enhanced comfort and ensures no harm is done to the skin, to allow the imperfections to slowly disappear through the body's natural healing process.

A series of 4 to 6 treatments may be needed for initial desired results, with occasional touch-ups as needed. OptaDerm has several price points depending on the area you wish to have service.

### Price Per Treatment Session

Hands	\$ 80
Face	\$160
Face and Neck	\$220
Face, Neck and Chest	\$300

## Blemish Correction with Combined Fractional 1540 and IPL Lasers

A specialized treatment designed to address acne blemishes and reduce the long-term pigmentation and scarring impacts associated with hormonal-driven adult acne. OptaDerm uses two types of Cynosure Laser Technology: Fractional 1540 Therapy and Intense Pulsed Light (IPL) Therapy. The healing process is accelerated by Fractional (Fraxal) laser technology and the reduction of inflammation and liquification of excess sebum oils is achieved with IPL. A series of 4–6 treatment sessions is usually needed for desired results. Certain skin types might require follow-on spot treatments.

### Price Per Treatment Session

Face	\$200
------	-------

## Laser Hair reduction with Intense Pulse Light Treatment (IPL)

Hair reduction is a non-ablative aesthetics-based service that will reduce hair growth. This advanced IPL, light-based treatment destroys hair follicles responsible for hair growth without harming surrounding tissue. OptaDerm uses Cynosure’s Icon Aesthetics System to deliver permanent hair reduction for all skin types. The Advanced Contact Cooling system provides relief from the moderate discomfort of this treatment. A series of 6 treatment sessions are needed for desired results. Certain skin types might require up to 3 ‘touch-ups’. Individual needs may vary. A commitment to a pre-set schedule of treatments is needed for best results.

A series of 6 treatment sessions will normally be needed for desired results, with annual touch-ups for clients under 50 years of age, and 6-month touch-ups for clients over 50 years of age.

OptaDerm has several price points depending on the area you wish to have service. We recommend having a European Facial first and then consulting with your Aesthetician as to the right treatments for you to is needed for best results

### Price Per Treatment Session

Upper Lip	\$ 48
Upper Lip and Chin	\$ 88
Upper Lip, Chin, and Cheeks	\$148
Gentlemen’s Lower Neck-Beard Control	\$ 88

OptaDerm has several price points depending on the area you wish to have service.

## Hyperpigmentation & Sun Damage Reduction with Q-Switched YAG Laser

Q-Switched YAG laser is a non-ablative aesthetics-based service that will decrease the appearance of brown spots and sun damage. This multi-wavelength system uses 1064nm and 532nm wavelengths to effectively reduce the appearance of dermal and epidermal pigmented lesions; including melasma, for a more evened skin tone. OptaDerm uses Cynosure’s Revlite Sl which is the new-generation Q-Switched Nd:YAG laser. This multi-wavelength system provides greater efficacy, comfort, and power.

A series of 4 to 12 treatment sessions may be needed for desired results, depending on the type of pigment, with touch-ups as needed.

OptaDerm has several price points depending on the area you wish to have service. We recommend having a European Facial first and then consulting with your Aesthetician as to the right treatments for you to consider before booking.

### Price Per Treatment Session

Hands	\$100
Facial Spots	\$80-\$160
Face	\$180
Face and Neck	\$240
Chest Only	\$120

## Skin Smoothing & Revitalization with Q-Switched YAG Laser

Q-Switched YAG laser is a non-ablative aesthetics-based service, that will smooth, perfect and plump for a more luminous appearance. This multi-wavelength system uses 1064nm and 532nm wavelengths to deliver energy deep into the skin targeting pigment and stimulating collagen. OptaDerm uses Cynosure's Revlite SI which is the new-generation Q-Switched Nd: YAG laser. This multi-wavelength system provides greater efficacy, comfort, and power.

A series of 4 to 6 treatment sessions may be needed for desired results, with touch-ups as desired. OptaDerm has several price points depending on the area you wish to have service. We recommend having a European Facial first and then consulting with your Aesthetician as to the right treatments for you to consider before booking online.

### Price Per Treatment Session

Face	\$180
Face and Neck	\$250
Face, Neck and Chest	\$340

## Thermal Contraction with RF Treatment

Radio-Frequency (RF) technology is a non-ablative aesthetics service that is used to provide skin contraction within the dermis of the skin. This RF energy will stimulate the formation of new collagen and improve skin elasticity for a smoother, tighter and more toned appearance. OptaDerm uses Inmode's Forma technology which is an auto-adjusting, non-invasive, thermal treatment for deep uniform tissue stimulation. The RF power flows uniformly between the electrodes for a comfortable experience.

A series of 6 to 8 treatment sessions are needed for desired results. Touch-ups can be done as often as the client desires. For clients, under 50 years of age, a touch-up is recommended every 6 months. For clients, over 50 years of age a touch-up is recommended every 3 months. OptaDerm has several price points depending on the area you wish to have service. We recommend having a European Facial first and then consulting with your Aesthetician as to the right treatments for you to consider before booking online.

### Price Per Treatment Session

Eye Area	\$ 80
Face	\$160
Face and Neck	\$200
Lower Face and Neck	\$140
Neck Only	\$ 80
Décolletage	\$120

# Our Terms and Conditions for Aesthetic Services

## Intake Forms

All Clients are required to provide information about allergies, medical conditions, and other specific conditions which will impact the products and services we provide for you. Your safety is our primary concern in this regard. Depending on the Services requested, you may be asked to provide information on our Intake Forms:

- **Aesthetics Intake Form**
- **Laser and/or Radio Frequency Services Consent Form**

We take your Privacy Rights very seriously in these matters and will only ask for information relevant to the specific purposes required to minimize potential harm to you. Our full Privacy Policy can be found here: [www.optaderm.com/privacy-policy](http://www.optaderm.com/privacy-policy)

## Frequently Asked Questions

### **Oh no! I have to cancel!**

That's ok, just give us 12 hours notice to avoid any cancellation fees and we will happily re-schedule you. P.S. we'll always try to confirm your appointment in advance by email, text, or phone calls as per your stated desire.

### **Cancellation Fees**

Things happen! We're human too. Our cancellation fees are \$50 per Treatment for less than 12 hours notice. Talk to us.

### **How do I pay?**

By Cash, Debit, Visa, Mastercard, American Express or by OptaDerm gift card.

### **Help, I lost my gift card.**

We're sorry, but gift cards can't be replaced if lost.

### **I'm late, I'm late!**

Please arrive on time (preferably a bit early) so that you can relax, get comfortable and fill out any paperwork required for your treatment. If you arrive late, we'll have to shorten your treatment time accordingly.

### **What to do with my jewelry?**

We will supply you with an envelope to put your jewelry in (and then just slip it into your bag). We can't be responsible for lost items.

### **Should I tip?**

Leaving a gratuity for service above and beyond is optional, and we thank-you kindly for your consideration. You'll have the opportunity to tip when paying with a charge card. The traditional industry gratuities generally range from 10% to 20% of the services price for European Facials, Resurfacing Facials and associated aesthetic services (brows, Make-up etcetera). However, we kindly decline gratuities on laser and radio frequency services.

## Our Skin Care Products

### How OptaDerm products work

OptaDerm products work with your skin's pH and barrier function. When these factors are out of balance, you'll notice more problems. OptaDerm skin care products work on the acidic side of pH, where the skin naturally wants to be. When your skin's too alkaline, you'll experience dryness and discomfort.

Ingredients in OptaDerm products are carefully chosen for their integrity, sensitivity and stability. You'll often see polypeptides and vitamin phosphates in our products.

When these peptide molecules are applied to our skin, our skin responds to the desired effect. Our peptides are fermented from carnauba palm juice.

Vitamin phosphates are used because they are more stable than the vitamin alone. We add esters to the vitamin molecule, which slows down the oxidization of the vitamin, allowing it to work better with less irritation.

### **Sensitive skin? Patch test, first.**

If you have skin sensitivity issues, we recommend you patch test for irritation before trying a new product. Apply a small amount of the product to your inner arm twice a day for a week, and keep watching to see if there's a reaction. Any tingling, redness or feeling of discomfort is likely a sign the product may not be right for you. Ask us to help find the one that is.

# Cleanse and Rinse

Clean skin; the first step to healthier skin. Skin must always be clean but not over-stripped of its functional barriers. Proper cleansing will keep blackheads and pore congestion to a minimum. Your skin should always feel refreshed after cleansing, not dry, tight, or greasy. Massage well with your cleanser and complete with a thorough rinsing of warm water – this will keep pore congestion to a minimum. A tonic rinse can complete the cleansing process and is especially helpful when your local water supply is too hard, too soft, or has other impurities outside normal ranges.

Dean-Richard says:

“Each cleanser I designed delivers a different feel and finish to your skin – to aid in creating long term cleansing habits and healthier skin.”

Helping you choose a Cleanser and Rinse product that’s right for you:

	PRODUCT TYPE	SKIN TYPE	ADDED FEATURES
<b>Cleansers</b>

# Exfoliate

Clear away dead skin cells and make way for smoother, radiant skin. Exfoliation keeps skin bright, clear, and encourages production of new skin cells in the epidermis. Physical exfoliation uses beads or grains to slough-off the uppermost layer of skin cells, while micro or chemical exfoliation uses acid and enzyme compounds to achieve the desired sloughing. Your skin type will determine the right solution and frequency of exfoliation for your skin.

Dean-Richard says:

“Each exfoliator I designed delivers a different level of exfoliation. Your skin type will determine the right one for you”

Helping you choose an Exfoliator product that’s right for you:

	PRODUCT TYPE	SKIN TYPE	pH
<b>Exfoliators</b>			
Clear Up Refreshing Skin Rinse	Acidic	Oily blemished skins	pH 4.0 – Two added acids to calm redness
Brighten Exfoliating Skin Rinse	Acidic	All skin types	pH 5.0 – 0.50% Glycolic Acid for gentle exfoliation
Performance Exfoliating Skin Rinse	Acidic	All skin types	pH 5.5 – Glycolic Acid at 8% for stronger exfoliation
Radiance Exfoliating Grains	Physical Grains	All skin types	pH 5.5 – Gentle round silica beads

# Moisturize

Moisturizing keeps the skin comfortable and moist to the touch. Genetics, life experiences, and age will determine the inevitable decrease in functionality; over time; of the skin’s barrier properties. The specific type of breakdown you experience will determine if hydration (water) or lubrication (skin-appropriate oils) are needed. Our Chemist and Founder; Richard Johansson, has researched and designed several formulations to meet specific skin conditions and address other factors such as age and the environment.

Dean-Richard says:

“Inevitably we will all need to use different types of moisturizing products as we age gracefully. Don’t be surprised to change products as conditions dictate.”

Helping you choose a Moisturizer product that’s right for you:

	PRODUCT TYPE	SKIN TYPE	ADDED FEATURES
<b>Moisturizers</b>			
Phenomena Facial Cream	Cream	Mature and over 40 years	Peptides in a dermal compatible delivery system for a unique feel
Phenomena Neck Cream	Cream	Mature and over 40 years	Special peptides for thinner neck skin
Integrity Facial Cream	Cream	All skin types	Epidermal strengthening cermides
Integrity Facial Lotion	Lotion	All skin types	Epidermal strengthening cermides
Control Facial Lotion	Gel / Lotion	Blemished skin	Light moisturizing with blemish control properties
Restructure Facial Cream	Thick Cream	All skin types	A barrier cream with an emollient feel
Replenish Facial Oil	Oil	All skin types	A light moisturizing feel for people who prefer an oil and have sensitive prone skin
Comfort Facial Balm	Balm	All skin types	An ointment balm feel for extremely dry, sensitive, or chapped skin

## MOISTURIZERS

 Peptides · Chrysin · Vitamin E Phosphates

# Protection

Protect your skin every day from the damaging rays of the sun. Protection from Broad Spectrum exposure is important for a lifetime of good skin.

Dean-Richard says:

“Sunscreen products protect you from burning, not tanning.”

Helping you choose a Protection product that’s right for you:

	PROTECTION TYPE	SKIN DELIVERY SYSTEM	PROTECTION LEVEL FOR EVERYDAY USE
<b>Protection</b>

UVA/UVB Protection · Broad Spectrum	240ml	\$32.50

# Serums and Concentrates

These are our signature peptide and saccharide-based formulations for skin improving effects. Our chemist and founder; Dean-Richard Johansson, has researched and designed several formulations to meet specific skin conditions and other factors such as age and the environment where the products are used.

Peptides are made of individual amino acids that are linked together like pearls on a necklace. The Amino Acid sequence and arrangements determine the function of each peptide. Saccharides, similar to Peptides, stimulate the production of hyaluronic acid and elastin in our skin

Dean-Richard says:

“Peptides are designed to stimulate the various types of collagens found in our skin. More peptides are needed as we age in order to target the diminishing collagen production in the dermis. Use these concentrates sparingly – its far more important to use a little every day than use too much at any one time.

Helping you choose a Serum or Conentrate product that’s right for you:

	ACTIVES ADDED	TARGETED AGE
<b>Serums and Concentrates</b>		
Transform Facial Concentrate	6 Peptides 2 Saccharides	50+
Transform Facial Concentrate Light Oil Free Formula	6 Peptides 2 Saccharides	50+

## Sample Kits

A skincare solution system in sample kit formats to allow our new clients to test our various products for 7 to 10 days. These new kits are designed to match typical skin-types and age-groups. A simpler way to introduce our OptaDerm line of products to interested clients. We have selected 7 of our most popular and well tolerated products for typical skin types at various ages. Each kit contains instructions how to use the products.

**Clients in their 20's** — Normal to Oily Skin Conditions \$28.50 each

**Clients in their 20's** — Normal to Dry Skin Conditions \$28.50 each

**Clients in their 30's** — Normal to Oily Skin Conditions \$28.50 each

**Clients in their 30's** — Normal to Dry Skin Conditions \$28.50 each

**Clients in their 40's** — All Skin Conditions \$28.50 each

**Clients in their 50's** — All Skin Conditions \$28.50 each
